

31st October 2022: Vessigny Secondary School, Trinidad and Tobago, commence Sandwatch

On 31st October 2022 the Sandwatch team from Mayaro Environmental Wave, led by Mr. Andy Paul, conducted a Sandwatch training session with 29 students and two teachers at Vessigny Secondary School.

The students were excited about Sandwatch. Three measurement points were established on the beach. A follow-up classroom session is scheduled for early November, after which the monitoring of the beach will take place monthly.

The monitoring data will be sent to the Sandwatch Foundation who will apply the results to fine-tune version 2 of the Beach Records Platform, which is scheduled to be launched January 2023.

Students from Vessigny Secondary School monitoring the beach and measuring water quality. 31st October 2022.
